COAL AGE

With Which is Consolidated
The Colliery Engineer

INDEX TO VOLUME XXI

January 1 to June 30, 1922

Note.—Illustrated articles are denoted by an asterisk (*), book notices by a dagger (†). Titles are often abbreviated. They are indexed under their most important words, or, if no word be distinctive, under their first one (except "A," "The," etc.) or under some topical word not found in the title.

Following is a list of the pages included in the several numbers of the volume by date:

		Pages
Jan.	5	1- 36
"	12	37- 74
"	19	75- 154
"	26	155- 194
Feb.	2	195- 232
"	9	233- 274
"	16	275- 314
"	23	315- 356
Mar.	2	357- 396
"	9	397- 436
"	16	437- 476
"	23	477- 520
"	30	521- 560
Apr.	6	561- 602
"	13	603- 642
"	20	643- 684
"	27	685- 724
May	4	725- 766
"	11	767- 808
"	18	809- 868
"	25	869- 910
June	1	911- 950
"	8	951- 992
"	15	993-1034
"	22	1035-1074
"	29	1075-1114

A

Abandoned areas, Sealing off. Discussion 493, 536, 966, 1052
Abandoned mine. Precautions in entering. 416
Ability to lead. Discussion 334
Academy of Political Science 746
Accident compensation 362
Accident cost grows steadily. Davidson.. 111
Accidents, eye 533
—Indiana 682
—Kansas 682
—Penn. 559
—Shaft 409
Aerophore *610
Age limit, Old age pension and. Discussion 1008
Air compression 929
Air lift pumping *969
Air nozzle for cleansing machines *329

ALABAMA

—Confirms status as open shop 108
—Explosions 259, 932
—Law re gaseous mines 210, 576

EXAMINATION QUESTIONS

—Ala. firebosses—Care and inspection safety lamps; removal of gas; improper handling safety lamps; quantity of air in circulation; volume of air circulation; volume of air per minute; mine examination; firedamp explosion in safety lamp 539. Examination of mine; procedure on finding explosive gas; examination worked-out rooms on live entries; examining working place generating gas freely and one giving off little gas; mine gases; safety lamp 579
—Ala. first-class—Qualifications for mine foremen; object in working places daily; ventilation; pressure increases in extended workings; precautions in stopping fans; danger in coal dust; precautions in abandoned mine..... 416
—Ala. second class—Roof falls; brattice for breakthroughs on entries and in rooms; haulage; timbering; insufficient air current; pillar drawing; conduct of mine foremen to hold respect of men 495
—Foremen and assistant foremen, 15th anthracite district—Duties exacted by law from operator and mine foreman; examination of mine; safety lamps; instruments to measure air currents 848. Mine gases; air current in abandoned chambers; manways of chambers; timbering; shafts vs. slopes; sinking a shaft; sinking slope; sinking double-track slope; square timbers in sinking slope 887
—Foreman and assistant foreman, 16th anthracite district—Carburated hydrogen; firedamp and blackdamp; detecting firedamp; blown out or windy shot; fixing quantity of air; quantity and velocity of air required; determining amount of air; use of electricity for power purposes in mines, 743. Air current; amount of rubbing surface; size of passageway; first aid; driving place toward water; withdrawing charge in case of misfire *785

Page

EXAMINATION QUESTIONS—Continued:
—Indiana mine firebosses'—Safety lamp; elements compose atmospheric air and percentage by volume; elements absorbed by air current; causes of mine fires; sealing off section to extinguish mine fire; chemical analysis of mine air 252
—Mine foremen and firebosses—Accident causes in West Va. and prevention; necessary supplies at mines; shooting from solid; limit to explosive carried in mine by one person and receptacle; methods of working; rescue from fire in intake airway; rescue and treatment for burns from ignition of pocket of gas 173
—Misc.—Driving rooms at angle; cleavage planes; cleats and joints; bench mining; panel method of mining ..*1011
—Misc.—Duties of mine foreman; working mine employing continuous air current; black powder vs. permissible; use of anemometer, barometer, hygrometer, thermometer and water gage; determining average velocity of air current in an airway; power to maintain constant current of air in circulation. 293
—Misc.—Explosives used in one drillhole; safest explosive; examining mine for nightshift; piping; supporting strength of hemlock prop; props necessary to prevent caving in of roof; size of rope required to pull out timber..... 621
—Misc.—Gas in heading; air lift pumping *969
—Misc.—Height attained by driving breast; permissible powders; electrical power for mine lamps; discharge of siphon; mine foreman's duties in fatal accidents; mine foreman's instructions to firebosses in gaseous mine; working near abandoned sections; precautions in production and distribution of coal dust 213
—Misc.—Hoisting on incline; units of work performed; unit of work defined; composition of firedamp and blackdamp; water-rate of engine; size of compressor; capacity of air compressor; volumetric efficiency in air compression 929
—Misc.—Instructions to miners to set props; meaning of 2 per cent. grade; form of airway; construction and ventilation of mine stable; tons held by mine car; fan ventilation; effect of ventilation on roof conditions... 335
—Misc.—Precautions in production and distribution coal dust; dangerous if dry and dusty at working face; timbering, roof and bottom; precautions hauling mantrips; guard against accidents in dusty mine; why is moisture necessary in mines; width of heading in rooms 456
—Misc.—Pumping; profit and loss in car of coal; effect of timber in roadway on ventilation; effect of opening of door on fan; meaning of dead hole and windy shot; operating electrical coal cutter under tender roof; procedure on finding gas in room; velocity of air current; electric cap lamps ... 375
—Misc.—Pumping; working seam with soft top; water-gage scales; water-gage reading; volume of air from single fan*661
—Misc.—Setting anchor post; air in pipes; converting steam into compressed air; working; timbering *702
—Misc.—Weight of steam consumed per hour; opening and closing valves to start and stop engine; meaning of windy shot and cause; results from two kinds of powder; pumping 54
—Misc.—Working vertical seam; underground stable; timber double-track parting; driving double rooms *1053
—Tenn. mine foremen—Requirements to hold certificate; penalties for failure to perform duty; mine gases and symbols; detection of mine gases; protection in gaseous mines; law in regard to operating without certified mine foreman; first-aid 1094
Experienced men perform more dangerous work. Discussion 577
